

## SOLUTION BRIEF:

# Improve Restaurant Operations with Proactive Endpoint Management

Restaurants have wholeheartedly embraced digital transformation with online ordering, self-service kiosks, and employees using mobile devices for everything from tableside service to taking drive-thru orders and curbside pickup. They have increased speed and efficiency, reduced the number of employees needed, improved customer experiences, and boosted profits.

But the rapid increase in digital devices is challenging the IT teams that keep them all running and secure. Effective endpoint management solutions should protect everything from customer information to sensitive company data, but they must also be fast and flexible—with positive user experiences that enhance, not hinder, operations.

Together, Stratix and Omnissa® tame the complexity of digital restaurant operations with proactive endpoint management that's secure and frictionless. Omnissa makes it easy to scale deployments and enables multiple use cases, including back of house and front of house.

## Omnissa Workspace ONE® Delivers an Engaging Employee Experience

### Unified Endpoint Management (UEM)

Manage the full lifecycle of any endpoint—mobile (Android®, iOS®), desktop (Windows®, macOS®, Chrome OSTM), rugged, mobile printers, and even IoT—from one management console.

### Intelligence Across Your Digital Environment

Leverage powerful automation of everyday IT tasks, use intelligent insights to improve operations and optimize the employee experience, ease the strain on support teams, and enable proactive management and security.

### Flexible and Scalable

Easily separate stores by location, scale, and separate brands within the organization to put them in logical management groups.

### Corporate Data Protection

Zero trust security to protect critical company data and defend against modern-day threats with conditional access and compliance policies. Workspace ONE UEM offers a comprehensive security approach encompassing user, endpoint, app, data, and network.

## Stratix Simplifies Restaurant Endpoint Management

Our expert enterprise mobility management (EMM) consultants will help you build the best endpoint management solution for your environment and goals. We handle the day-to-day administration, upgrades, updates, and troubleshooting so your IT staff can focus on innovation and growth activities.

- **Solution Design** – We work to fully understand your requirements and match you with the best EMM platform. We build the EMM environmental structure and layout with an eye on futureproofing and potential capacity expansion.
- **Professional Services** – We offer health checks for your current EMM platform along with consolidation, migration, or new implementation services.
- **Onboarding/Deployment** – We do EMM device enrollment, profile and configuration setup, application of security and compliance policies, app distribution, and IT and third-party systems integration.
- **Help Desk** – Our technicians assist with escalation and issue resolution, device remote control, monitoring, analysis, and reporting.
- **Ongoing Administration** – We handle the day-to-day management of your EMM environment, including change management, OS and app updates or rollouts, and API and automation integration.
- **Lifecycle Management** – Our services include migration planning, version control, inventory management and asset tracking, and integration for efficient RMA/repair operations.
